HOW WE SEE THINGS

Pontoon boats are an uncomplicated way to get there, and it's why we love them, but Harris isn't an industry leader by simple chance.

We earn our legacy by setting a standard of innovation.

Yes, we can make a better pontoon

Making better boats is central to the Harris identity. Introduced in 2024, our **RPM** Technology forms the foundation of every boat in our lineup. It enhances every part of boating—ride, performance, maneuverability—to heighten your on-the-water experience.

*Compared to previous Harris models under comparable test conditions. Fuel efficiency based on average across various load conditions. Acceleration based on average improvement in 0-30mph time. Handling and spray based on characteristics in similar turns performed on the same models from prior years and under similar water conditions. Many factors may affect the performance of boats. Such factors include, but are not limited to, installation of certain options such as towers, vessel loading and trim, weather and sea conditions, engine condition, propeller condition and hull bottom condition.

Which one OF THESE
TYPES OF HARRIS *owners*
SOUNDS MOST LIKE *you*?

THE NEWCOMER

You'd like to take more time to relax and reflect outdoors with the people you love, but you need those experiences to leave you feeling refreshed, not overwhelmed or exasperated by unexpected obstacles.

THE NAVIGATOR

Taking friends and family for pleasure cruises is something you could do any day of the week. When it comes to boating, you need options for activities that can keep everyone from antsy kids to fun-loving adults happy for hours at a time.

THE CURATOR

You're the ultimate host's *ultimate host* and you believe spending time on the water can be awe-worthy. When you get underway, you want to feel transported; you want to feel at home and in your element far from any worldly worry on land.

A newcomer's dream

If you're just beginning to envision more time with friends and family on the water, we recommend starting with model families like Breeze and Cruiser.
